

UVC LLC's UV Blue SHO Technology for HVAC

Designed, tested and made in the USA

From Brad Hollander, inventor of UVC for HVAC and germicidal disinfection expert since 1976

“Because the air you breathe is making you sick”

HIGHEST POWER UVC LAMPS AT 1/4 THE PRICE OF COMPETITORS

COVID-19 and its variants sounded the alarm about airborne viruses and bacteria. Air disinfection is the new battleground in the ongoing fight to protect our communities.

Why UVC germicidal lights?

- Ultraviolet-C (UVC) disinfection is a safe, proven, EPA-approved, chemical-free technology that kills germs in the air
- UVC 254 nm light is most effective at killing germs
- Often used in hospitals to fight airborne illnesses and drug-resistant “superbugs”

Why UVC LLC's exclusive Blue SHO Technology for HVAC?

- Highest killing power of any other germicidal UV lamp or system offered today
- Proven to kill up to 99.9% of Covid 19 variants, flus, colds and diseases
- Our exclusive Smart Ballast Technology™ has the highest electrical efficiency
- Installs in your HVAC in minutes at 1/4 the price of the competition

Buyer Beware: *Many so-called UVC companies sell products that have not been tested by certified lamps and are made in foreign countries, without oversight.*
